1.1 to 75 kW

- Fixed Speed
- Regulated Speed
- Open or Enclosed Formats

Hydrovane. Our business

Hydrovane has manufactured over 775,000 compressors to date and they can be found throughout all sectors of industry, with specialist solutions within transit, gas and snow. In fact they are the perfect solution to meet your requirements for reliable, high quality compressed air or gas.

Hydrovane’s principle global manufacturing and distribution centre is based at Redditch in the UK. The Hydrovane management system conforms to BS EN ISO 9001: 2008, ensuring the manufacture of first class compressors. For over 50 years Hydrovane has been a market leader in rotary sliding vane compressors, which are proven to be:

- **Reliable**
  - Up to 100,000+ operating hours due to its simple integral design
  - Delivering quality pulse free air with automatic regulation
  - Low speed, direct drive, minimal stresses and no roller bearings to replace.

- **Versatile**
  - Quiet in operation and can be located at the point of use
  - Air intake modulation produces only the air you require
  - Complete packages or separate air ends
  - Open and enclosed formats.

- **Powerful and Cost Effective**
  - Energy Saving Regulated Speed models
  - Reduced Energy Venting System (REVS) for lower off-load power consumption
  - Easy and cost competitive maintenance
  - 10 year Advance™ extended warranty programme.

The Hydrovane principle

- A. Air is drawn in through the intake valve.
- B. Air is contained between the rotor and the stator wall.
- C. Air is compressed by decreasing volume.
- Oil is continually injected to cool, seal and lubricate.
- D. High pressure air passes into the primary oil separator.
- E. Remaining traces of oil are removed in a final separator element, providing high quality air.
- F. System air passes through the aftercooler, removing most of the condensate.
- G. Oil is circulated by differential internal air pressure. It passes through an air-blast oil cooler and filter before being returned into the compressor.
- H. Air flow is regulated by an inbuilt modulation system.

The Hydrovane Advantages.
Our compressors’ features are ultimately your benefits

- **Long life and reliability by design**
  Proven, simple and long-lasting technology with fewer moving parts, allowing up to 100,000+ operating hours being achieved with no expensive Air End change or refurbishment, when correctly serviced with genuine parts and lubricants. Proven solutions for more challenging conditions.

- **Electronic control - Hydrovane Pro Controller**
  This new control system continuously monitors the operational parameters of the compressor, incorporates MODBUS as standard and has the capacity to have programmable inputs and outputs for increased control of ancillary equipment. Offering the customer total control, greater connectivity and flexibility.

- **Quiet as standard**
  With noise levels as low as 62 dB(A), even in an open format. A Hydrovane can be located at the point of use.

- **No roller bearings**
  Hydrovane uses white metal bearings instead of roller bearings, ensuring long life. No replacements and reduced maintenance costs.

- **Slow Speed**
  All Hydrovane Fixed Speed models operate at a slow 1450 rpm. Even Hydrovane Regulated Speed models operate from only 880 to 2220 rpm*. Slow speed operation results in low noise, low stresses and long life.

- **High quality air**
  Hydrovane compressed air is clean, dry and pulse free straight from the outlet, with no receiver required as standard. Oil carryover (OCO) is typically less than 3 ppm. Less downstream equipment required.

- **Direct drive**
  No gears and no belts mean fewer components to maintain, fail or replace, and no power loss. Maximising energy consumption.

- **Intake modulation control**
  With automatic regulation, a Hydrovane only compresses the air demanded by the system. No wasteful overproduction of air.

- **Ease of maintenance**
  Common replacement items such as air/oil separators and oil filters are all “spin-off/spin-on”*. Delivering quick, cost effective servicing, with minimal downtime.

- **Reduced Energy Venting System (REVS)**
  Solenoid control rapidly vents the internal pressure to 2 bar; reducing off-load power to as low as 20% as well as lowering the starting current*. Reducing energy consumption.

- **Regulated Speed (RS) Energy Efficiency**
  Regulated Speed compressor models are available*, where air output exactly matches the demand, utilising proven air cooled inverter technology. Typically delivering energy savings of 30 - 50% annually.

- **Package Options**
  Power ranges 1.1 kW to 7.5 kW available in an economical open style package. Power ranges 4 kW to 75 kW available in enclosed style package which offer a smaller relative size footprint. Probably the most versatile range of compressor on the market.

- **Performance improvement**
  A Hydrovane’s performance improves over time once parts are bedded-in within the rotor stator unit resulting from standard operation. Reducing power consumption and energy costs.

- **Market leading warranty**
  Up to 10 years or 48,000 operating hours** is available to protect your investment. Total peace of mind.

- **Reduced Energy Venting System (REVS)**
  Solenoid control rapidly vents the internal pressure to 2 bar; reducing off-load power to as low as 20% as well as lowering the starting current*. Reducing energy consumption.

* Model dependent  ** Subject to Terms and Conditions
Energy saving. Hydrovane leads from the front

The reduction of energy wastage and ultimately energy costs is an increasing priority for every business within every market sector on a global basis. To help achieve this objective, Hydrovane offers a comprehensive range of Regulated Speed compressors.

Hydrovane Regulated Speed compressors can reduce your energy bills by up to 50% with a typical payback in 3 years*.

Hydrovane Regulated Speed (RS) Compressors
Regulated speed compressors from Hydrovane (7.5 to 75** kW ACE) can efficiently and reliably meet the varying air demand found in the majority of air systems, by automatically controlling air output to meet your exact requirements. The right regulated speed compressor in the right application delivers significant energy savings and a stable air supply at a constant pressure. Most air systems operate between 50% and 75% of full load capacity.

How does a Hydrovane RS compressor save energy?
- RS control ensures optimum load conditions throughout the speed range - Delivering maximum efficiency
- Air intake modulation at minimum speed deliveries further energy savings - To match the reducing air demand
- In-built Reduced Energy Venting System (REVS) - Improved part-load and off-load performance
- Optimised motor, drive and air end (6 to 10 bar*) - Proven air cooled inverter drive
- High efficiency across a broad flow range - Substantial energy savings delivered.

Reduced Energy Venting System (REVS) Inside
REVS is a pneumatic system that reduces the internal compressor pressure to 2 bar***, when the air demand reduces to zero (off-load), reducing energy consumption to as low as 20%. Air is instantly available at anytime during this venting period. Motor power is also reduced on re-start, as the intake valve is closed during the start sequence. REVS is standard on all Fixed and Regulated Speed compressors (ACE and PEAS).

Government Subsidies
As global energy costs continue to rise, many governments are introducing schemes to reward moves towards energy saving and greener technologies. Please contact your local government department or local authorised Hydrovane distributor for information on what schemes are available in your territory.

Air System Energy Review
Please contact your local authorised Hydrovane distributor for an Air System Energy Review and Data Logging.

* Model dependent    ** 55 kW RS is not available within the current range   *** 60 Secs at 8 bar / 90 Secs at 10 bar
50 Hz Hydrovane Pro Electronic Controller. 
HV04 - HV75 (4 - 75 kW) Models

All Hydrovane compressors in both Fixed and Regulated Speed in the 4 to 75 kW ACE and PEAS ranges now come with the Hydrovane Pro Electronic Controller. This new control system ensures reliable operation and protects your investment by continuously monitoring the operational parameters of the compressor. The Hydrovane Pro also has the capability to have programmable inputs and outputs for increased control of ancillary equipment.

It is now possible to simply connect a Hydrovane Pro controlled compressor to the range of Sequencer Technologies within the Gardner Denver group allowing flexibility of use and maximising energy reduction.

Controller Features:
- **Real Time Clock** - Visibility and removing the need for an external timer
- **Timer Control** - Start/stop at set times offering flexibility
- **Second Pressure Setting** - Different pressure setting for low production periods
- **Status Display** - Words not codes, in multiple languages
- **Group Fault Outputs** - Forward to an external monitoring device
- **Error Logs** - Explanation, times and dates
- **Digital Inputs** - 4 digital inputs for external control of ancillary equipment
- **MODBUS RTU** - RS485 enabled, communication with external interfaces
- **Sequencer Capability** - Pro Master 4, SmartAir Lite and Connect 4
- **Flash Programmable** - Software upgrades completed on-site

Air Management Systems. Electronic Sequencers

Electronic compressed air management control system sequencers are available, which are designed to save energy. Sequencers have a compact all inclusive design, and come complete with fully programmed software to meet most requirements. The sequencer allows central control of multi compressor installations, resulting in a large reduction in energy consumption. Compressors are only brought ‘on-line’ when needed, so service costs are minimized. Sequencers constantly sense system pressure and immediately respond to pressure changes, resulting in a totally reliable air supply.

Hydrovane Pro-Master Sequencer Series

The Hydrovane Pro-Master 4 is a narrow pressure band controller used as a compressor sequencer suitable for an installation of up to 4 compressors. It has four different pre-programmed defined sequences that provide a solution for specific characteristics of any installation:

- **First In First Out (FIFO)**
- **Timer Rotation**
- **Equal Hours**
- **Fixed Cascade**

The sequencer has a number of adjustable parameters offering flexibility to adapt the control mode to further fine tune the operation to suit the installation site, including Pre-Fill.
The industrial sectors we serve.
Proven applications

Hydrovane provides versatile energy efficient air and gas compression within a wide range of industries, covering numerous applications:

**Automotive and Garage**
Tyre inflation / Product finishing / Air operated robots / Plasma cutting and welding / Air tools / Paint shops / Breathing air.

**Construction**
Fluidization of product / Reverse jet cleaning / Shot blasting / Pneumatic drilling, ramming or piling machines / Concrete conveying or spraying / Air conditioning / Air operated tools / Ventilation systems / Blasting.

**Energy (Including Gas)**
Gas boosting for micro turbines / Air operated process equipment / Process / Cooling / Air operated pumps / Filter cleaning / Pipe pigging / Cleaning / Wind generation / Control valves / Raw material handling / Conveying / Filtration cleaning.

**Entertainment and Leisure**
Water fountains / Leisure pools / Theme park rides / Simulators.

**Farm and Agriculture**
Milk production / Farm equipment / Conveying.

**Food and Beverage**
Packaging / Product handling / Food filling machines / Fluid pumps / Nitrogen generation / Air knives.

**Manufacturing**
Aluminium and steel processing plants / Air operated tools / Spray finishing equipment / Air operating lifting equipment / Shot blasting / Cooling and heating / Cleaning / Welding equipment.

**Marine**
Breathing air / Nitrogen generation / Air tools / Air grinder / Paint spraying equipment / Ballast water purification / Dock loading equipment / Chemical tankers.

**Medical and Dental**
Air driven medical tools / Breathing air / Sterilization equipment / Laboratory applications / Dentists / Air separation.

**Military**
Mobile tyre inflation / Simulators / Shooting range targets / Mobile tank cannon cleaning.

**Pharmaceutical**
Process air / Control valves and cylinders / Material handling / Nitrogen generation / Air curtains / Product drying.

**Snow**
Snow cannons.

**Special Applications**
Aluminium smelting plant gantry crane / Cement batching plant / Water industry – purity control / Dentistry / Food packaging / Farming / Construction / Shipboard / Low duty usage / Duplex configurations / Mobile motor racing – tyre inflation, etc.

**Transit - Main Line and Light Rail Trains, Underground Trains, Shunters, Trams, Metros and Hybrid/Electric Buses**
Air braking systems / Air operated doors / Suspension systems / Floor levelling systems / Pantographs / Claxons (horns) / Wipers.

**Utility Services**
Fibre optic cable blowing / Sewage plant flow control and air oxidation / Water purification and oxidation / Landfill sites.

Please visit our website for a comprehensive listing of applications by industrial sector at www.hydrovaneproducts.com
Custom Solutions. Versatile technology

The Hydrovane rotary vane compressor technology is an incredibly versatile piece of engineering. The possibilities are endless when it comes to supplying air to a specific application inside and outside the standard industrial arena. Hydrovane has over 50 years experience in supplying proven solutions to OEMs, either as air ends or complete packages, designed and purpose built. In addition, there are occasions when a customer may require a special build, and this is where Hydrovane can deliver custom solutions.
Hydrovane service philosophy is one of regular maintenance being the key to long, reliable, trouble free compressor life. Hydrovane offers extensive aftermarket support with genuine service kits, individual spare parts and approved lubricants for both our current compressor models and historical models from a comprehensive catalogue.

Only Hydrovane Aftermarket can provide:

- **Protection**
  Compressor longevity and a lifetime of productivity

- **Reliability**
  Regular Preventative Maintenance Programme

- **Quality**
  Genuine OEM engineered service kits, parts and lubricants

- **Performance**
  Guaranteed efficiency and optimisation, year in year out

- **Business made easy**
  Dedicated support team to handle all your Aftermarket needs

- **Value for money**
  Everything you need under one roof.

**Service Kits – Genuine OEM spare parts**

The service kit concept has been developed to make our compressor servicing quick, easy and cost effective. Hydrovane kits have been carefully constructed to contain all the necessary parts required for an effective preventative maintenance programme. Using the service kits as part of the recommended service schedule will prevent costly breakdowns, ensuring a continuous supply of high quality compressed air.

**Lubricants – Approved for vane usage**

Even the most reliable compressors in the world require routine lubricant changes to maintain peak performance. Over many years, Hydrovane has developed a range of high quality lubricants that have been specifically formulated to guarantee optimum compressor performance and designed to:

- Seal
- Cool
- Lubricate

The Hydrovane range of approved Fluid Force lubricants are:

- Fluid Force Red 2000  For standard installations
- Fluid Force HPO  For high temperature and arduous environments
- Fluid Force Clear  For food and environmentally sensitive applications. Also used for oil change flushing operations
- Fluid Force Gas  For sweet, sour and bio gas boosting*.

**Service Training**

Hydrovane is committed to providing every Hydrovane compressor owner with fully trained Service Engineers to care for their investment throughout our Global Distribution Network. All Service Engineers are trained on the proven procedures for servicing and repairs.

* The Hydrovane gas compressor range is covered within a separate sales brochure.
Advance™10
Warranty that delivers complete peace of mind

The Hydrovane Advance 10 extended warranty programme is a unique market leading compressor care package designed to deliver comprehensive warranty cover for up to 10 years or 48,000 operating hours* on all Hydrovane compressor airends**. This includes a life-time guarantee on the cast iron vane blades contained within the compression element.***

The use of genuine service kits, parts and lubricants are mandatory for continued Advance warranty cover. Advance servicing must be carried out by an authorised Hydrovane Distributor, whose personnel are fully trained and competent in the maintenance of a Hydrovane Compressor.

Your key benefits:

🎯 Free
   The Advance warranty is totally free to the compressor owner***

🎯 Guaranteed Quality
   A Hydrovane authorised service provider will deliver a guaranteed quality of service

🎯 Accurate Maintenance Budgeting
   An Advance service agreement underpinning the warranty will enable accurate maintenance budgeting and cost of ownership

🎯 Maximise Compressor Life
   The use of genuine Hydrovane service kits, parts and lubricants will maximise compressor life and efficiency.

Standard Warranty
All Hydrovane compressors are guaranteed for 12 months from the date of installation providing the installation is approved by an authorised Hydrovane distributor and the correct service procedures and genuine service kits, parts and lubricants are used.

Please consult your local Hydrovane Distributor for Advance availability within your territory.

* Whichever comes first.
** Excluding gas compressors, HV04RM, HV05RM and HV07RM and non-standard product (NSP).
*** Subject to Terms and Conditions.

See Hydrovane Advance 10 brochure for more details.
The HV (ACE) range of compressors is the heart of the Hydrovane product line, offering world class flexibility and reliability. Maintenance time and costs are reduced by simple construction and grouped service components, with 'spin-off/spin-on' maintenance items i.e. air/oil separators and oil filters.

The HV (ACE) range is enclosed for quiet operation, with a small footprint, and they can be conveniently located at the point of use. Installation is hassle free, as all enclosed units will fit through a standard 915mm (36”) door opening and stand on a flat floor surface.

### Specified Overview:
- 10 bar
- Low Noise: 62 to 73 dB(A)
- Slow Speed: 1450 rpm (50Hz) 1760 rpm (60 Hz)
- IP55 Electric Motor Rating
- Direct Drive
- Less than 3 ppm Oil Carryover
- Standard Starter
- Integral Oil Cooler**
- Continuous Run or Start/Stop
- Standard 1 Year Warranty

### Receivers (BS EN 286-1: Air and Nitrogen only):
- HV01 and HV02 (1.1 – 2.2 kW) - 75 litre receiver
- HV04 (4 kW), HV05 (5.5 kW) and HV07 (7.5 kW) - 200 litre receiver

* PUTS (Package Unit, Tripod and Starter) and PURS (Package Unit, Receiver and Starter).
** HV04, 05 and 07 available in receiver mounted version only, as standard.
*** Air aftercooler kit available (HV01 – HV02RM (PURS and PUTS) plus HV04RM (PURS) only).

The only model available in 60 Hz is the 1.5 kW PUTS / PURS.

Hypac versions available (HV01RM to HV04RM): Aftercooler, Dryer and Filtration.

### 50 / 60 Hz Enclosed – Fixed Speed

The HV (ACE) range of compressors is the heart of the Hydrovane product line, offering world class flexibility and reliability. Maintenance time and costs are reduced by simple construction and grouped service components, with 'spin-off/spin-on' maintenance items i.e. air/oil separators and oil filters.

The HV (ACE) range is enclosed for quiet operation, with a small footprint, and they can be conveniently located at the point of use. Installation is hassle free, as all enclosed units will fit through a standard 915mm (36”) door opening and stand on a flat floor surface.

### Specification Overview:
- 7 and 10 bar - 4 to 7.5 kW
- 8 and 10 bar - 11 to 45 kW
- Low Noise: 66 to 73 dB(A)
- Slow Speed: 1450 rpm (50Hz) 1760 rpm (60 Hz)
- Full Air Intake Modulation
- Low Off-load Power (REVS)
- Direct Drive
- Fully Enclosed
- IP55 Electric Motor Rating
- Less than 3 ppm Oil Carryover
- Pro Electronic Controller
- Automatic Start/Stop
- Over-Temperature Protection
- Remote Air Intake Filtration
- Smallest Footprint in its Class
- High Quality Air <10°C Above Ambient
- Integral Air and Oil Cooler
- Standard 1 Year Warranty
- Advance 10 Year Warranty Available**

* ACE (Air Centre Electronic) ** Subject to Terms and Conditions.
The HV (ACE) RS range provides a variable speed offering for the Enclosed product selection. Whilst most fixed speed compressors are most efficient in continuous duty applications, regulated speed machines optimise energy efficiency when operated below full load capacity. However, most air installations operate between 50% and 75% of full load capacity.

The HV (ACE) RS series offer all the same features and benefits of the Enclosed Fixed Speed models; REVS off-load Power System, small footprint and low noise levels, with easy installation at point of use, plus the added benefits of saving up to 50% energy savings due to decreased energy consumption. RS units only produce the amount of air required to meet the application demand.

**Specification Overview:**
- 6 to 10 bar
- Low Noise: 67 to 73 dB(A)
- Slow Speed: 880-2220** rpm
- Proven Air Cooled Inverter Drive
- Built-in EMC Filter
- Line Reactor (Choke) Standard
- Low Off-load Power (REVS)
- Direct Drive
- Fully Enclosed
- IP55 Electric Motor Rating
- Less than 3 ppm Oil Carryover
- Pro Electronic Controller
- Selectable Target Pressure
- Automatic Start/Stop
- Full Air Intake Modulation
- Over-Temperature Protection
- Remote Air Intake Filtration
- Smallest Footprint in its Class
- High Quality Air <10°C Above Ambient
- Integral Air and Oil Cooler
- Standard 1 Year Warranty
- Advance 10 Year Warranty Available***

Hypac builds are not available.

The energy saving Regulated Speed option is only available in 75 kW.

**Specification Overview:**
- 6 to 8 bar – 75 kW
- Slow Speed: 1450 rpm

The energy saving Regulated Speed option is only available in 75 kW.

The HV (ACE) range of enclosed fixed and regulated speed compressors offers world class flexibility and reliability to customers and satisfies the larger air demands of industry. Operating at slow speed with direct drive, coupled with few moving parts means less components to fail and no power loss through belts or gears, with the added benefit of low noise levels. Maintenance time and costs are reduced by the simple construction and grouped service components; ‘spin-off/spin-on’ air/oil separators and oil filters.

The HV (ACE) RS offers energy savings up to 50% due to reduced energy consumption. RS units only produce the air required to meet the application demand.

**Specification Overview:**
- 6 to 8 bar – 75 kW
- Slow Speed: 1450 rpm

The energy saving Regulated Speed option is only available in 75 kW.

**Regulated Speed**
- Low Noise: 67 to 73 dB(A)
- Lower Off-load Power (Auto-Idle)
- Direct Drive
- Fully Enclosed
- IP55 Electric Motor Rating
- Less than 3 ppm Oil Carryover
- Pro Electronic Controller
- Automatic Start/Stop
- Full Air Intake Modulation

**All Compressors**
- Over-temperature Protection
- Remote Air Intake Filtration
- High Quality Air <10°C Above Ambient
- Integral Air and Oil Cooler
- Standard 1 Year Warranty
- Advance 10 Year Warranty Available***
Air Management Systems. Simple Controllers
Controller Options for Standard Starters - HV01 to HV04 Models Only

**HP02 Duty Selector**
- The duty selector is ideal where fluctuating air demand exists.
- Reduces energy consumption and balances the running hours of each compressor unit.
- Two compressors can be remotely selected in two modes, base load or standby duties.

**HP04 Automatic Time Controller**
- A time controller that enables the operating times of the compressor to be pre-programmed for a period of up to one week.
- The compressor will switch on and off at preset times.
- The compressor retains its auto start functions offering greater flexibility.

**HP05 Remote Stop/Start Controller**
- Allows compressors to be remotely operated.
- This controller is fitted with 'compressor running' and 'compressor tripped' indicators to give the operator information on the compressor's status.

**HP06 Short Run Auto Timer (Low Duty Usage)**
- HV01 and HV02 Models Only
- This auto timer is designed to prevent condensation build-up where compressors run for short periods of time.
- The Auto Timer starts the compressor at an off duty period and runs it 'on-load' for a period at optimum working temperature to remove any excess moisture (Discharging to atmosphere).
- A Hydrovane compressor must run for a minimum of 2 hours per week discharging to atmosphere for the moisture to be removed (When in use).

50 Hz Hypac (Packaged Units)

Membrane Dryer Range
**HV01 – HV04 (1.1 – 4 kW) Fixed Speed Models**

Hydrovane HV (PURS) range of Open fixed speed compressors are available as fully integrated packages. Hypacs are available as a factory built package or can be supplied as a kit for local assembly.

**Specification Overview:**
- HV01 and HV02 (1.1 and 2.2 kW)
- 75 Litre Receiver**
- HV04 (4 kW)
- 200 Litre Receiver**
- Open Compressor
- Membrane Dryer Technology
- Ultra Dry Air
- Pressure Dew Point 30°C Below Ambient
- In-line Filtration (0.01 micron)
- Automatic Start/Stop
- Fully Connected and Ready to Run
- Aftercooler for Primary Water Separation
- Standard 1 Year Warranty

* PURS (Package Unit, Receiver and Starter) ** Receivers: (BS EN 286-1: Air and Nitrogen only)

HV05 RM and HV07 RM are not available as Hypacs.
The HV (ACE) Enclosed range of compressors are available in 3 versions; fully connected and ready to run – ACER, ACED and AERD.

- **ACE with Receiver**
  - Specification Overview:
    - Hydrovane Enclosed Compressor
    - Integrated with Receiver***
    - HV04 to HV07 (4 to 7.5 kW) - 250 Litre Receiver
    - HV11 to HV22 (11 to 22 kW) - 272 Litre Receiver
    - Regulated Speed Option
    - Automatic Start/Stop Option
  - Regulated Speed Option
  - Automatic Start/Stop Option

- **ACE with Dryer and Filtration**
  - Specification Overview:
    - Hydrovane Enclosed Compressor
    - Integrated with Refrigerant Dryer
    - Water Trap
    - Refrigerant Dryer
    - In-line Filter (1 micron)
    - Regulated Speed Option
    - Automatic Start/Stop Option

- **ACE with Receiver, Dryer and Filtration**
  - Specification Overview:
    - Hydrovane Enclosed Compressor
    - Integrated with Refrigerant Dryer and Receiver***
    - HV04 to HV07 (4 to 7.5 kW) - 250 Litre Receiver
    - HV11 to HV22 (11 to 22 kW) - 272 Litre Receiver
    - Water Trap
    - Refrigerant Dryer
    - In-line Filter (1 micron)
    - Regulated Speed Option
    - Automatic Start/Stop Option

All ACER, ACED and AERD Hypacs Warranty Cover:

- Standard 1 Year Warranty
- Advance 10 Year Warranty available**

- DOL: Direct On Line
- SD: Star Delta
- V: Regulated Speed (RS)

Free Air Delivered (FAD) according to ISO 1217:2009-Annex B, C and E
Both fixed speed and regulated speed compressors operate up to 40°C ambient.
Hydovane compressors are designed for indoor installation under cover only.
### Enclosed - Regulated Speed (RS)

Note: The only 60 Hz model available is the HV01RM.

Hypac-Membrane dryer kits installed within the factory have a nominal fitting charge. Please contact your local distributor to determine your exact requirements.

Note: There are no 60 Hz Hypac models.
Please contact your local authorised Hydrovane distributor to discuss your needs and how we can reduce your energy costs with a compressed air system energy audit.
